Giovanni Reale

A History of Ancient Philosophy

I. From the Origins to Socrates

EDITED AND TRANSLATED FROM THE FOURTH ITALIAN EDITION

John R. Catan

State University of New York Press

TABLE OF CONTENTS

Foreword xv
Preface xix
Preface to the American Edition xxiii
Translator's Preface xxvii

Introduction
THE ORIGIN, NATURE, AND DEVELOPMENT OF PHILOSOPHY AND THE PHILOSOPHICAL PROBLEMS OF ANTIQUITY

I. The Birth of Philosophy in Greece 5
   1. Philosophy as a creation of the Greek genius
   2. The inconsistency of the thesis of a presumed derivation of philosophy from the East
   3. The unique theoretical transformation of the Egyptian and Chaldaic knowledges produced by the Greek spirit
   4. Conclusions

II. The Forms of the Intellectual Life of the Greeks that Prepared for the Advent of Philosophy 11
   1. The Homeric poems
   2. The Gods of state religion and their relation to philosophy
   3. The mystery religions: the influence of Orphism on the establishment of the problematic of ancient philosophy
   4. The political, social, and economic conditions that favored the birth of philosophy among the Greeks

III. The Nature and Problems of Ancient Philosophy 17
   1. The defining characteristics of ancient philosophy
   2. The problems of ancient philosophy

IV. The Periods of Ancient Philosophy 23

First Part
THE PHILOSOPHERS OF NATURE: THE IONIANS AND THE ITALIANS. THE PROBLEMS OF NATURE, OF BEING, AND OF THE COSMOS

First Section
PRELUDE TO THE COSMOLOGICAL PROBLEM

I. The Theogonic and Cosmogonic Myths 29

Second Section

THE MILESIANS AND HERACLITUS

I. Thales 35
1. The philosophic propositions attributed to Thales
2. The meaning of "principle"
3. Water as the principle
4. Other propositions of Thales

II. Anaximander 39
1. The infinite as the principle and its characteristics
2. The origin of all things from the infinite
3. The infinite worlds and the origin of our world

III. Anaximenes 45
1. Air as the principle
2. The derivation of all things from air
3. The relationship of Anaximenes to his predecessors

IV. Heraclitus of Ephesus 49
1. The perpetual flux of all things
2. The opposites in which becoming unfolds and thier hidden harmony (the synthesis of opposites)
3. Fire as the principle of all things
4. The soul

Third Section

PYTHAGOREANISM

I. The Reason That We Speak about the Pythagoreans in General and not about Individual Pythagoreans. The Characteristics of the Pythagorean School. 59

II. A New Conception of the Principle 61
1. Number as the principle of all things
2. The elements of number: their fundamental opposition and harmony
3. The transition from number to things
4. The foundation of the concept of the "cosmos": the universe is an "order"

III. The Pythagorean Faith: Man, His Soul, and His Destiny 67

IV. The Structural Aporias of Pythagoreanism 71

1. The aporias concerning God and the Divine
2. The aporias concerning the soul

Fourth Section
XENOPHANES AND THE ELEATICS

I. Xenophanes 77
1. The position of Xenophanes with respect to the eleatics
2. The criticism of the conception of the Gods and the destruction of the presupposed traditional religion
3. God and the Divine according to Xenophanes
4. The physics of Xenophanes
5. Moral notions

II. Parmenides 83
1. The three ways of inquiry
2. The way of unconditioned truth
3. The way of error
4. The third way: the explanation of the plausibility of phenomena and the Parmenidean "doxa"
5. The structural aporia of Parmenidean philosophy

III. Zeno of Elea 91
1. The origin of dialectical demonstration
2. The dialectical arguments against movement
3. The dialectical arguments against multiplicity
4. The importance of Zeno

IV. Melissus of Samos 97
1. The systematization of Eleaticism
2. The attributes of being and their deduction
3. The elimination of the domain of experience and of "doxa"

Fifth Section
THE PLURALISTS AND THE ECLECTIC PHYSICISTS

I. Empedocles 103
1. The four "elements"
2. Love and Hate
3. The Sphere (Σφαῖρος) and the cosmos
4. Knowledge
5. The soul and the Divine

6. The Empedoclean aporias

II. Anaxagoras of Clazomenae 111
1. The homoiomeries
2. The divine Mind
3. The Anaxagorean aporias

III. The Atomists 117
1. The discovery of the atoms as principles
2. Atoms, mechanical movement, and necessity
3. Man, soul, and the Divine
4. Knowledge
5. Democritean ethics

IV. The Eclectic Physicists 127
1. The phenomenon of the eclectic physicists and the decline of the philosophy of nature
2. Diogenes of Apollonia and his historical significance
3. Archelaus of Athens

Second Part
THE SOPHISTS: THE TRANSITION FROM THE PHILOSOPHY OF NATURE TO MORAL PHILOSOPHY

First Section
THE ORIGIN AND NATURE OF THE MORAL PROBLEM

I. Why the Philosophical Problem about Human Beings Does Not Arise Together with the Problem of the Cosmos 137

II. Some Terminological and Conceptual Distinctions That Are Essential to the Understanding of Ethical Problems 139

III. Moral Reflection Prior to the Birth of Moral Philosophy 141

Second Section
THE SOPHISTS

I. The Origin, Nature, and Goals of the Sophistic Movement 149
1. The significance of the term "sophist"
2. The reasons for the rise of Sophistry
3. The inductive method of sophistic inquiry
4. The practical goals of Sophistry

5. The financial compensation demanded by the Sophists
6. The pan-Hellenic spirit of Sophistry
7. The enlightenment of the Greek Sophists
8. The different currents of Sophistry

II. Protagoras 157
1. The principle that "man is the measure"
2. The principle of the twofold contradictory reasons and its application
3. The teaching of "virtue" and the meaning of this term
4. The limitation on the range of the principle that "man is the measure"
5. The utilitarian background of Protagorean philosophy
6. The attitude of Protagoras concerning the Gods

III. Gorgias 165
1. The negation of truth
2. Being does not exist
3. Even if being existed it would be inconceivable
4. Even if being were conceivable it would be inexpressible
5. The refuge in the domain of the experiential and the reality of the situation
6. Rhetoric and the omnipotence of words
7. Words and poetic deception and illusion

IV. Prodicus of Keos 173
1. The invention of synonymy
2. Utilitarian ethics and the myth of the "uncertainty of Heracles"
3. The Gods as deifications of utility

V. Hippias and Antiphon 179
1. The naturalistic current of Sophistry
2. The method of the "polymathia" of Hippias
3. The opposition between "law" and "nature"
4. The radicalization of the contrast between "law" and "nature" in Antiphon
5. Cosmopolitanism and naturalistic egalitarianism

VI. Eristic and Political Sophistry 183
1. The characteristics of the Eristics
2. The theses maintained by the political Sophists

VII. The Conclusions of Sophistry 189

Third Part

SOCRATES AND THE MINOR SOCRATICS: THE FOUNDATION OF MORAL PHILOSOPHY

First Section

SOCRATES AND THE DISCOVERY OF THE NATURE OF MAN

I. The Socratic Question and the Problem of the Sources 195

II. Socratic Ethics 199

1. Socrates in relationship to the philosophy of "nature"
2. The discovery of the nature of man
3. The determination of and documents relative to the new Socratic conception of "psyche"
4. The new meaning of "*arete*" and the revolution in the table of values
5. The "paradoxes" of Socratic ethics
6. Self-control, interior liberty, and autonomy
7. Pleasure, utility, and happiness
8. Friendship
9. Politics
10. The revolution of non-violence

III. Socratic Theology and Its Significance 225

1. The position of Socrates in relation to the theological problem
2. God as purposeful and providential mind
3. The *daimonion* of Socrates
4. The relations between the theology and ethics of Socrates

IV. Socratic Dialectic 239

1. The protreptic function of the dialogical method
2. Socratic ignorance
3. Socratic irony
4. Refutation (the *elenchos*) and the maieutic art
5. Socrates, founder of Logic?

V. The Aporias and Structural Limitations of Socraticism 253

Second Section

THE MINOR SOCRATICS

I. The Circle of the Socratics and the Socratic Schools 259

II. Antisthenes and the Foundation of the Cynic School 263

1. The relationship of Antisthenes to Socrates
2. The message of liberation and liberty
3. The liberation of the appetites and pleasure
4. The liberation from the illusions created by society and the exaltation of manual labor
5. Antisthenes, the founder of Cynicism

III. Aristippus and the Cyrenaic School 271

1. The relationship of Aristippus to Socrates
2. The theoretical presuppositions of Cyrenaicism
3. Cyrenaic hedonism
4. The breakdown of the "ethos" of the city-state

IV. Euclid and the Megaric School 281

1. The philosophy of Euclid as a tentative synthesis of Eleaticism and Socraticism
2. The Eleatic component
3. The Socratic component
4. The integration of Eleaticism and Socraticism and its importance
5. The Megaric eristic and Socratic dialectic

V. Phaedo and the School at Elis 287

VI. Conclusions about the Minor Socratics 289

First Appendix

ORPHISM AND THE NOVELTY OF ITS MESSAGE

1. The extant Oprhic literature and its value 293
2. The basic novelty of Orphism 294
3. Orphism and the belief in metempsychosis 297
4. The final end of the soul according to Orphism 300
5. Orphic theogony, the myth of Dionysus and the Titans and the cause of the original fault that the soul must expiate 301
6. Initiations and Orphic purifications 304

Second Appendix

Determinations of the Fundamental Characteristics of the Greek Concept of Philosophy

1. The object of ancient philosophy as the "totality" of being 307
2. Philosophy as a primary need of the human spirit 312
3. The aim of philosophy as the contemplation of being 315
4. The practical-moral ramifications of philosophy: Greek "theorein" is not abstract thinking, but a thinking that is profoundly immersed in the ethico-political life 317
5. Philosophy and "eudaimonia" 321
6. The radical faith of Greek philosophy in the possibility of achieving the truth and of living in accordance with it 323
7. The method of ancient philosophy 325
