

# THE GENESIS OF TWENTIETH CENTURY PHILOSOPHY

The Evolution of Thought  
from Copernicus to the Present

HARRY PROSCH

*Professor and Chairman  
of the Department of Philosophy  
Skidmore College*

Doubleday & Company, Inc.  
Garden City, New York

1964

# CONTENTS

## PART ONE THE ADVENT OF MODERN SCIENCE

- Introduction 3  
The purpose of the book. The reasons for beginning with the Copernican revolution.
- Chapter I. The Copernican Revolution 9  
The world as understood before the Copernican revolution. The Copernican revolution.
- Chapter II. The Pieces of the Puzzle 22  
One piece: The shape of the planets' orbits (Kepler). A second piece: The components of curved motion (Galileo). A third piece: Geometric matter and motion as the basis of things (Descartes).
- Chapter III. The Newtonian System 48  
Newtonian physics: The nature and value of the science itself. Newtonian metaphysics: The view of the ultimate nature of things entangled in the science. Newtonian method: How the "scientific method" involved came to be thought of as *the* science of knowing.

## PART TWO THE PHILOSOPHICAL PROBLEMS INVOLVED (*Metaphysical and Epistemological*)

- Chapter IV. The Yawning Chasm of Skepticism 83  
Distinguishing primary from secondary qualities (Locke). The

essential emptiness of the notion of matter (Berkeley). The essential emptiness of any notion (Hume).

Chapter V. The Basis of Knowledge in Skepticism 111

The need for the *a priori* (Kant). The isomorphism of mind and nature. The *a priori* synthetic. Noumena as the limits of our knowledge.

Chapter VI. Kant's "Destruction" of Metaphysics 137

The ideas of reason. The antinomies of reason. The three directions from Kant.

PART THREE

THE PHILOSOPHICAL PROBLEMS INVOLVED  
(Moral and Political)

Chapter VII. The Rights of Atomic Men 165

The need for a secularly based ethics of individualism. The natural man and the artificial State (Hobbes). The natural rights of natural man—life, liberty, and property (Locke).

Chapter VIII. The Society of Atomic Men 188

Private property and peace (Hume). Private property and the wealth of nations (Adam Smith).

Chapter IX. Atomic Men and the "General Will" 213

The limitations of Utilitarianism. The "general will" (Rousseau). The moral imperative in the general will (Kant). The practical implications of Kant's "categorical imperative."

Chapter X. The Fusion of Atomic Men 245

The categorical imperative and Hegel's "ethical life." The "right of subjective freedom." Property realizes the will, the family, and the civil society. The "Crown" realizes the State. Historical alternatives to Hegel's "Crown": British and American.

Chapter XI. The "Absolute" Mind 277

The "transcendental hypothesis" of Kant. The contradiction in Hegel's "Being." "Becoming" becomes the truth of "Being." Absolute Mind.

PART FOUR  
THE SHAPE OF CONTEMPORARY PHILOSOPHY

Chapter XII. The Problem after Evolution	309
Hegel's inverted empiricism. "The System" comes in with the tide. "Evolution" provides an alternative to teleology. "Mind" becomes an object-in-flux. The four reigning alternatives to "reason."	
Chapter XIII. Marxism and Pragmatism	326
The "existence" of philosophic movements. Marxism. Pragmatism. Their opposed affinities.	
Chapter XIV. Analytical Philosophy and Existentialism	348
The importance of the "stuffing"— <i>contra</i> Hegel. The analytical philosophers. The existentialists. Their opposition as moments of the "what."	
Chapter XV. Conclusion	378
Each contemporary "school" requires the other three. None of the elements of "becoming" can be the unconditioned. Whitehead's "Platonism." The "adequate" philosophy.
